

# The Digital Payment Journey: Real-time Trackability That Delivers Consumer Happiness

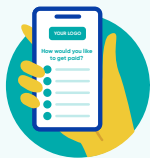

Payouts for rebates, refunds, litigation claims, or other one-time consumer compensation can lead to huge headaches if they're not efficient and trackable. With DigitalPay, you get secure, fast digital payments tracked at every step of the delivery process to keep both internal users and payees very happy.

## The Journey of a Digital Payment

### 1. Payment Created

The journey begins! The payee's name, amount owed, and payment duration are set. From this point, we track the payment until funds are received.

### 3. Paywall & Payment Selection

The payee chooses where they want their money from an array of enticing options. No apps, no fuss. We monitor preferences to continually optimize choices.

### 5. Payment Confirmation

The final touch: a confirmation email with all the details, providing peace of mind and an end-to-end record. This also aids in resolving any "where's my payment?" inquiries swiftly.

### 2. Payment Notification

A custom-branded email lands in the payee's inbox, detailing why they're getting paid and how much. Every click and open is trackable, allowing us to refine and boost engagement.

### 4. Payment Processing

Funds move only after the payee makes their selection, ensuring precise reconciliation and funds management.
